  61% - HSC

- **SHARADA MANDIR GIRLS HIGH SCHOOL (2017)**
  78% - SSC

EXPERIENCE

TECH MAHINDRA

January 2024- June 2024

- Regen.AI - Project allows users to generate, compare, edit, and label AI responses as helpful, harmful, or honest, with a history and rating system for annotators. Project managers can log in, manage project details and team members, and view project completion graphs.

- INDUS - Building India's own large language model (LLM) from the ground up, Project Indus is our effort to celebrate India's rich language heritage. It is a foundation model that will enable and simplify communication across the country and preserve our languages and dialects

---

PROJECT

- Student Management System: This project involves implementing basic functions such as adding, updating, viewing, searching, and removing student records, as well as exporting student data to an Excel file. It uses Python to interact with a MySQL database for data storage and management.

- (FINAL YEAR PROJECT) Smart Saver Expense Tracker: Designing a comprehensive expense tracking application with Flutter and Firebase integration to help users manage finances efficiently and make informed financial decisions.

- Traffic Sign Detection: Python-based software for classifying traffic signs based on data, classes, with deep learning framework.
